2020-Present

## About me

---

Dedicated and considerate backend developer with 2 years of experience. Successfully developed robust and scalable web applications, showcasing my commitment to delivering high-quality code and innovative solutions. I also love going on bicycle rides and collecting vintage cassettes, reflecting my passion for both analog nostalgia and the peace of exploring the outdoors.

## Professional Experience

---

Volunteering engagements

2021-2022.

- Volunteered at two IT4Business conferences held in Subotica hosted by Subotica ITCluster.
- Volunteered at tree planting actions around main roads in my hometown.

Infostud Group internship at 4zida.rs

2022.

At the 4zida.rs, with the supervision of my mentor,

- Learned to develop REST API web platforms with Symfony 6.2 framework and AngularJS.
- I've had to set up a Docker container for local development.
- Used Git for versioning the code.
- Used MySQL database for storing the data.
- Also I was contributing the frontend part of the project written in Angular and Angular Material.

Part-time developer at 4zida.rs

01. 2023. - 10. 2023.

- Worked in a professional team
- Acquired good teamworking skills
- Worked on difficult tasks with 100% success rate

## Achievements

---

2022. BizKod v6 hackaton - 1st place
